Residence One, Jelupang, Kec. Serpong Utara, Kota Tangerang Selatan, Banten

Profile

Computer Science student at BINUS University with hands-on project experience in full-stack web development, natural language processing (NLP), and computer vision. Projects include building real-time web applications, machine learning models, and automated classification systems. Seeking a software engineering or AI engineering internship opportunity to contribute to dynamic development teams and expand technical expertise.

Projects

Real-Time Multiplayer Jeopardy Web App

Tech Stack: React, Vite, Node.js, Express, WebSockets, CSS, Discord SDK

- Developed an interactive web-based Jeopardy trivia game featuring customizable clue boards, media integration, and real-time multiplayer synchronization.
- Integrated Discord Activity SDK to enable multiplayer gameplay directly within Discord channels.

Indonesian Sarcasm Detection & Sentiment Analysis

Tech Stack: Python, IndoBERT, RoBERTa, mBERT

- Conducted applied AI research evaluating classical machine learning models and Transformer architectures for detecting sarcasm in social media text.
- Fine-tuned IndoBERT and RoBERTa models to achieve high classification accuracy and F1-score performance.

Automated Fruit Ripeness Classification System

Tech Stack: Python, OpenCV, scikit-image, SVM, Random Forest

- Built an end-to-end computer vision pipeline to classify fruit ripeness across multiple fruit types (apples, bananas, oranges).
- Extracted HSV color features and GLCM texture features to train and evaluate SVM and Random Forest classification models.

Role-Based Library Management System

Tech Stack: JavaScript, Node.js, Express, SQLite, React, CSS

- Designed and implemented a web application featuring book inventory management, member administration, loan processing, and automated late fee calculations.

Skills & Technical Expertise

- Languages: English, Bahasa Indonesia
- Programming & Web: Python, JavaScript, C, C++, HTML, CSS, React, Vite, Node.js, Express.js, WebSockets, REST API, SQLite, Java
- AI & Data Science: Machine Learning, Natural Language Processing (NLP), Computer Vision, OpenCV
- Tools & Platforms: Git, GitHub, Visual Studio Code, Google Colab, Figma
- Soft Skills: Teamwork, Communication, Problem-solving, Time Management

Education

Bina Nusantara University, Undergraduate School of Computer Science GPA: 3.5/4.00

Relevant CourseWork

- Data Structures & Algorithms
- Object-Oriented Programming
- Web Programming
- Database Systems
- Artificial Intelligence
- Computer Networks

Organization Experience

Member, Design and Documentation – HISHOT

- Designed visual promotional assets and managed digital media documentation for event activities.

Activist Member, Creative and Design (CnD) - HIMTI

- Created branding and digital media designs for student organization initiatives.

Member, Design and Documentation – HIMTI Talkshow

- Coordinated visual media creation and event coverage for technology talk shows.

Certifications & Achievements

- Microsoft Azure AI Fundamentals – Microsoft Learn
- Advanced English Certification – BINUS University
- Participant in OSN-K Kimia 2022 - SMA Athalia

Volunteer

First Aid Member (P3K) – AthaCup SMA Athalia

- Provided emergency support and first aid assistance during inter-school sports competitions.

Internet Positivity Documentation Team – SMP Pahoa

- Documented junior high school students on healthy digital habits, online safety, and internet positivity.
